

# **Veza for Workday**

Connect Workday HCM to Veza to protect access to sensitive employee data in Workday, visualize employee access to all system and leverage Workday as your identity source of truth for access reviews and certifications.

## Protect your sensitive data and processes

Track access for any Workday Account to Security Policies, via user and role-based security groups.

Detect and revoke inappropriate access to sensitive employee data or business processes.

## Visualize employee access to all systems

Capture all Worker records from Workday and combine with records from your identity providers and data systems.

See all access for any Worker across SaaS, on-premise, cloud, and custom apps.

Reveal risky access from thirdparty Workers like external contractors.

#### Base access reviews on Workday

Use Worker records as your identity source of truth to automatically compile, assign, and schedule access reviews.

Review and certify all access for Workers across all systems.

#### Monitor Access

### Risk Intelligence

Workday contains highly sensitive employee data. Veza continually monitors for new access. Triage threats with reports on risky access, such as access from external, dormant or over-privileged Workers. Remediate

Integrate with ITSM tools and custom webhooks for fast, reliable reconciliation.
