

Veza Integrations

Veza provides 325+ out-of-the-box integrations that pull metadata from identity systems, cloud service providers, data systems, and on-prem applications to reveal the effective permissions to your most critical data.

Key Benefits

Rapid Deployment

Configure most integrations in less than 15 minutes.

Broad Coverage

Out-of-the-box Integrations for critical systems spanning identity providers, cloud providers, SaaS apps, data lakes, and on-prem applications.

Out-of-Band Deployment

Avoid the risk of service interruptions inherent to inline solutions.

Flexibility

Rapid integration with custom applications using Open Authorization API (OAA), SCIM, CSV or direct database connections.

Key Features

Over 325 Integrations

Off-the-shelf integrations require no custom development to connect to your systems.

Open Authorization API (OAA)

Veza's Open Authorization API (OAA) allows for rapid development of integrations for custom applications without the need for expensive professional services engagements.

SCIM Support

Connect to an application's System for Cross-domain Identity Management (SCIM) API endpoints to extract User and Group authorization metadata directly.

Self-Service Data Import

Import data directly into your Veza tenant when direct API access is unavailable.

Integrations

Identity Providers

 Active Directory (AD)	 Auth0	 AWS IAM	 Azure AD / Entra ID
 CyberArk Identity	 Google Workspace	 GCP IAM	 Okta
 OneLogin	 Oracle Cloud IAM	 Ping Identity	 Red Hat Identity Management

Cloud Providers

 Amazon Web Services (AWS)	 Microsoft Azure	 Google Cloud Platform (GCP)	 Kubernetes
 Oracle Cloud Infrastructure (OCI)			

HR Systems

 Workday	 BambooHR	 Beeline	 Coupa Contingent Workforce
 HiBob	 Oracle HCM	 SAP SuccessFactors	 UKGPro
 CSV Upload			

Self Managed Systems

 Bitbucket Data Center	 Cassandra	 Confluence Server	 Exchange Server
 Jira Data Center	 Microsoft SQL Server	 MySQL DB Standalone	 Oracle DB
 Oracle EBS	 PostgreSQL DB Standalone	 PTC Windchill	 Solarwinds Platform
 Windows File Server	 Windows Servers		

Data Systems

Cloud Services (Data Systems, Infrastructure)

Amazon Web Services (AWS)

Generic Connectors

Open Authorization API for Custom Apps & Systems

Veza's Open Authorization API (OAA) is a set of APIs that allow customers to integrate any system (custom applications, in house applications, custom identity systems, etc.) with the Veza Authorization Platform. Customers have integrated hundreds of custom in-house systems into Veza using OAA. Veza OAA Solution Brief available [here](#).

About Veza

Veza is the identity security platform. Identity and security teams use Veza to secure identity access across SaaS apps, on-prem apps, data systems, and cloud infrastructure. Veza solves the blind spots of traditional identity tools with its unique ability to ingest and organize permissions metadata in the Veza Access Graph. Global enterprises like Wynn Resorts, and Expedia trust Veza to visualize access permissions, monitor permissions activity, automate access reviews, and remediate privilege violations. Founded in 2020, Veza is headquartered in Los Gatos, California, and is funded by Accel, Bain Capital, Ballistic Ventures, GV, Norwest Venture Partners, and True Ventures. Visit us at veza.com and follow us on [LinkedIn](#), [Twitter](#), and [YouTube](#).
